

Solar washing machine

SPECIFICATIONS	
Product capacity	9kg
Power	500 W
Voltage	24V DC
Size	940 x 570 x 550 mm
Loading	Top-loading
Spin speed	1300 rpm
Weight	40 kg

- ◆ Use solar electricity without an inverter to wash clothes using a VIA solar power system or your own 24V power system
- ◆ Cold water washing only - can add hot water if heated externally
- ◆ 250 Wh of energy per average wash cycle
- ◆ 25-35 minutes average total wash cycle time
- ◆ Maximum water level 68L
- ◆ Maximum water consumption 120L
- ◆ Low water pressure inlet 0.03MPa-1.0MPa
- ◆ Drain pump can transport water into container
- ◆ Use with 250-500Wp of solar to wash 4-8 loads per day as a laundromat micro-business, or 100Wp for personal use
